

## High Reliability Metal Melting Furnace Low Maintenance Electric high frequency induction furnace

### Our Product Introduction

for more products please visit us on [melt-furnaces.com](http://melt-furnaces.com)

#### Basic Information

- Place of Origin: China
- Brand Name: Huarui
- Certification: patent; national testing report; quality management system
- Model Number: to be negotiated
- Minimum Order Quantity: 1 set
- Price: to be negotiated
- Packaging Details: water proof
- Delivery Time: 30~45 days
- Payment Terms: T/T; L/C
- Supply Ability: 1000000 sets/year

#### Product Specification

- Reliability: High
- Maintenance: Low
- Power Saving: High
- Melting Efficiency: High
- Durability: High
- Safety: Complete
- Highlight: **High Reliability Metal Melting Furnace, Metal Melting Furnace Low Maintenance, Electric High Frequency Induction Furnace**

## Product Description

### Product Description:

Metal Melting Furnace System - High Melting Efficiency, Low Maintenance, High Durability, High Reliability and Complete Safety -----

Our Metal Furnace System is designed with high melting efficiency, low maintenance, high durability, high reliability and complete safety. Our electric induction furnace is the perfect choice for metal melting. With its advanced electric induction melting furnace, it can ensure complete safety and superior reliability. The metal melting induction furnace for metal melting offers superior durability and superior performance. The user-friendly design makes it easy to operate and maintain.

The Metal Melting Furnace System has a high melting efficiency and low maintenance costs. The furnace is highly efficient, allowing you to save energy and reduce costs. It is also designed to be safe and reliable. With its advanced electric induction melting furnace, it ensures complete safety and superior reliability.

The Metal Furnace System is highly durable and reliable. The furnace is made of high-quality materials that are resistant to wear and tear. It is also designed to be safe and reliable. With its advanced metal melting induction melting furnace, it ensures complete safety and superior reliability.

The Induction Furnace System is designed with safety in mind. It is equipped with numerous safety features, such as temperature sensors, emergency shut-off systems and other safety features. It also has a user-friendly design, making it easy to operate and maintain. With its advanced electric induction melting furnace, it ensures complete safety and superior reliability.

Our Induction Furnace System is the ideal choice for metal melting. With its advanced electric induction melting furnace, it ensures complete safety and superior reliability. The user-friendly design makes it easy to operate and maintain. The high melting efficiency and low maintenance costs make it the perfect choice for metal melting.

### Features:

**Metal Melting Induction Melting Furnace:** Durability: High, Safety: Complete, Melting Efficiency: High, Maintenance: Low, Reliability: High

**Induction Melting Furnace:** Durability: High, Safety: Complete, Melting Efficiency: High, Maintenance: Low, Reliability: High

**Electric Induction Furnace for Metal Melting:** Durability: High, Safety: Complete, Melting Efficiency: High, Maintenance: Low, Reliability: High

### Technical Parameters:

Induction melting furnace power supply, thyristor type serial-connected resonance medium frequency type, (0.5 tons), as for other data of other capacity (tons), please check other pages in our this website.

| Characteristic               | Description   |
|------------------------------|---|
| Type                         | GW0.5-400-1.5S  |
| Rated capacity (T)           | 0.5   |
| Rated power (KW)             | 400   |
| rated frequency (HZ)         | 1500  |
| power supply (V)             | 380   |
| inlet current (A)            | 652.8   |
| medium frequency voltage (V) | 2500  |
| load type                    | One power supply cabinet drives one induction furnace |
| adapted transformer (KVA)    | 400   |

### Applications:

The **Huarui metal melting furnace system** is designed for melting metal and offers a number of advantages. It is a **high-efficiency** electric induction melting furnace, allowing for faster and safer melting of metal. It is also very **durable** and **reliable**, with a **low maintenance** requirement. Moreover, it is **safe** to use, with a patent, national testing report and quality management system. All of these features make Huarui induction furnace system a great choice for any melting metal needs.

Huarui induction furnace system is available with a minimum order quantity of one set. The price and model can be negotiated according to the buyer's specifications. The delivery time is usually between 30 to 45 days, with payment terms of T/T or L/C accepted. Moreover, the company has a **supply ability** of up to one million sets per year.

## Support and Services:

### Induction Furnace System Technical Support and Services

We provide specialized technical support and services for our Induction Furnace System. Our team of highly trained and experienced technicians are available to answer any questions you might have about our product. We provide a variety of services to help you get the most benefit out of your metal melting furnace system such as:

Installation and troubleshooting

Repair and maintenance

System upgrades

Parts replacement

User training and support

We are committed to providing quality service and support so that your Induction Furnace System is always running at peak performance. If you have any questions or need assistance, please do not hesitate to contact us.

## Packing and Shipping:

### Packaging and Shipping

The Induction Furnace System is packaged in a sturdy cardboard box. It should be handled with care during packaging and shipping to ensure that it is not damaged in transportation. The box should be clearly labelled with the product name. It should also contain a packing list including instructions on how to assemble and use the product.

The box should be shipped with a reputable courier service. It should be insured for the full value of the product to protect against any potential damages in transportation.
